iParadox
Alarm System Control

Description

The iParadox mobile application enables users to remotely access their Paradox security system. iParadox provides access to alarm system functions and information via a mobile device. The multi-lingual app has an intuitive user-interface which enables the user to easily connect to their security system and edit its settings. With arm / disarm control, PGM control, and live system status, iParadox turns any Wi-Fi or 3G iPhone, iPod Touch, iPad or Android™ phone into a remote keypad. Now users can control their Paradox security system from their favorite Apple™ or Android device!

Features
iParadox for iOS

Lite and Full Version Features:

• iOS4 to iOS7 compatible

• Compatible with EVO Series (V2.20 or higher), and all MGSP control panels (requires IP100 V5.10 or higher or IP150)

• Compatible with iPhone, iPod Touch and iPad

• Displays alarm memory

• Displays system troubles

• Functions via Wi-Fi or 3G

Full Version Features Only:

• Multi-site support (up to 32): one connection at a time

• Arm / disarm system remotely

• One-touch arm / disarm for all areas - EVO only

• Bypass Zones

• Displays module label when module trouble occurs

• Displays type of alarms (silent, audible, etc.)

• Control up to 16 PGMs with MG/SP panels and up to 5 PGMs with EVO panels

• Supports utility keys for PGM activation

• Customizable PGM labels

• Supports 24+ languages

• Connects with static or dynamic IP (ParadoxMyHome)

iParadox for Android

iOS Features Plus:

• Vibrate and/or sound upon an alarm

• Portrait and landscape mode support

• True tablet support (no stretched icons, etc.)

• Can run in background; allowing users to perform other tasks

• Easily program preferred displays of zone systems, status and bypasses

• Ability to support languages not supported by the mobile device

• Faster/easier navigation between screens; user can tap on screen to go forward/backward instead of using button or keys

• More web-like interface with less dialog pop-ups

• Supported by Android v1.6 or higher

# Highlights

Security System Controls

- Remotely arm / disarm system

- Receive automatic email notification when alarm is activated or when system is disarmed

- Check the current status of the alarm system

- Notification of troubles
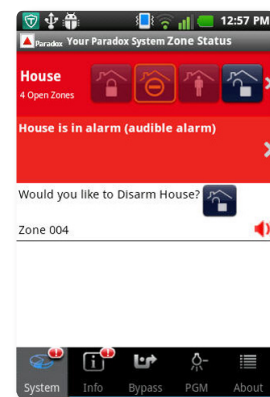

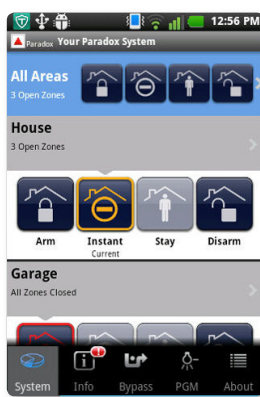

Programmable Outputs (PGMs)

- Turn on / off lights

- Control window shutters

- Control garage doors

- Control garden sprinklers

- And many more

NOTE: iParadox will not push alarm status notifications. In order to see if the system is in alarm, the iParadox app must be running.
